Green Energy Storage Corp

Project No. 14613-000

Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments,
Motions to Intervene, and Competing Applications

On April 2, 2014, Green Energy Storage Corp filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Weed Heights Pumped Storage Project to be located off-stream near Yerington, Nevada. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed 150-megawatt closed loop pumped storage project would use the 775 feet of available head between a new upper reservoir and an existing open pit mine. The project would consist of the following: (1) a new 35-foot-high upper dam with a total crest length of 8,000 feet, impounding an upper reservoir with a maximum storage of 2,600 acre-feet; (2) an existing open pit mine lower reservoir, with a maximum storage of 3,000 acre-feet; (3) a tunnel connecting the two reservoirs consisting of a 800-foot-long, 16-foot-diameter shaft; (4) two 75-megawatt pump/turbines; (5) a 2,700-foot-long, 16-foot-diameter draft tube, extending from the turbines to the lower reservoir; (6) a new 120-kilovolt (kV) transmission line extending about 7 miles from a new substation to the existing 120-kV transmission line owned by Sierra Pacific Power; and (7) appurtenant facilities. The estimated average annual energy production would be 400 gigawatt hours.

Applicant Contact: Charles Gresham, Green Energy Storage Company, 14747 N 87th Ln, Peoria, AZ 85381, Telephone (602) 478-9161
